SKILLS

Languages: Python, Java, SQL, GoLang, JavaScript

Technologies: AWS, PostgreSQL, MongoDB, InfluxDB, Firebase, Docker, Kubernetes, Terraform, Github Actions, Grafana

AI Tools: Claude Code, Cursor, CodeRabbit, OpenDesign, LangChain, n8n agentic workflows

Frameworks: Django, Expo, Pandas, React.JS, React Native, Express.JS, TailwindCSS

WORK EXPERIENCE

Humatics - Software Engineer

Boston, MA | Mar 2024 – June 2026

- Responsible for development and QA of a real-time **IoT** monitoring dashboard based on **Angular**, adding new features, visualization, scaling to 100+ concurrent devices cutting UI response times by **80%**.
- Created a **GPT4.5**-based AI chatbot integrated with **AWS Batch** and **AWS Athena**, building automated workflows to enable self-service operational data exploration through conversational queries.
- Architected and deployed an event-driven AI agentic workflow in **Python** using **LangGraph** and MCP to automate enterprise IoT maintenance operations.
- Engineered an asynchronous sensor data ETL pipeline and **REST APIs** to compute KPIs from datasets, enabling on-demand historical data re-computation across arbitrary date ranges with **S3** artifact versioning and analytics dashboard visualization.
- Built an end-to-end SMS and email notification pipeline using **AWS Lambda** and SNS, with configurable recipient groups.
- Improved data retrieval time from **InfluxDB** database by 60% leveraging parallel queries, and added a process-level logger; also leveraged **Grafana**, **Loki**, and **Prometheus** for log exploration and monitoring.
- Reduced operational risk and automated software deployments by creating per-PR deployable sandbox environments using **AWS CDK** (Infrastructure as Code) and **GitHub Actions** testing loops, increasing team deployment velocity by **35%**.

TrekIt - Founding Software Engineer

New York, NY | Jul 2023 - Mar 2024

- Joined as the first engineer, developing a cross-platform mobile application for travel itinerary and expense management using **React Native**, **Express.js**, **Firebase**, and **Expo**.
- Designed system architecture, API endpoints, and core system logic; actively involved in interviewing and expanding the team.
- Integrated **GPT-3.5** to build a conversational AI feature for personalized itinerary generation, handling API integration and frontend chat UI.

IpsierLabs - Software Development Intern

Mountain View, CA | Feb 2023 - May 2023

- Built secure login and enterprise authentication systems in **Java**, implementing session management, Object-Oriented Programming (OOP) principles, and secure access control.
- Integrated web crawling services to populate a **PostgreSQL** relational database for downstream application use.
- Designed and developed responsive web pages and dashboard functionality using **React.js**, **D3.js**, and **TailwindCSS**.

IpsierLabs - Software Development Intern

Mountain View, CA | Jun 2022 - Aug 2022

- Developed **RESTful** backend services and microservices with **Node.js**, **Express**, and **MySQL** for an e-commerce platform; integrated Stripe API for third-party payment integrations.
- Migrated a legacy codebase to **React.js** and **TailwindCSS**, improving maintainability and developer velocity.

PROJECTS

Distributed Ledger - Kubernetes Architecture - [Github](#)

June 2026 - July 2026

- Engineered a high-throughput **Go** order matching engine and ACID-compliant **PostgreSQL** ledger using **Redis** Streams for fault tolerance, deploying the microservices to an **OpenTofu**-provisioned **Kubernetes** cluster monitored via **Prometheus** and **Grafana**.

BroCode - Cloud IDE - [Github](#)

Nov 2022 - Dec 2022

- Designed and developed a multi-language online IDE for code snippet compilation and execution using AWS services.
- Spun up **Docker** containers on an **ECS**-managed **EC2** instance, enabling auto-scaling and load balancing, to provide seamless code execution with language-specific compilers. Added code autocomplete using OpenAI's Codex API.

Memories - Voice-based Smart Photo Album - [Github](#)

Sept 2022 - Nov 2022

- Built a serverless smart photo album with voice search utilizing **AWS Rekognition**, **Lex**, and **ElasticSearch**; implemented CI/CD via **AWS CodePipeline** to automate S3 and Lambda deployments on GitHub commits.

EDUCATION

New York University - Master of Science in Computer Science

New York, NY | Sep 2021 - May 2023

University of Mumbai - Bachelor of Engineering in Computer Engineering

Mumbai, India | Aug 2017 - Jun 2021
